

Project management and governance that keep delivery moving

Clear structure. Real ownership. Zero surprises.

Introduction

At TCT, we run SAP projects the way they should be run: with clarity, discipline and complete accountability. We don't just plan work we lead it. From governance and communication to risk control and day-to-day delivery, our approach keeps everything aligned, compliant and on track.

When we manage your programme, nothing slips through the cracks.

Governance that builds confidence. Strong governance is the backbone of any successful SAP project. We keep delivery controlled and transparent, so you always know where you stand and what's coming next.

That's where we come in.

Reveal and resolve your SAP pain points

You'll get regular status updates and structured steering meetings, ensuring that progress, decisions and risks are always visible. We align to your internal processes, define clear roles and responsibilities and track delivery against plan and budget giving you confidence that everything is moving exactly as it should. And when risks arise, we act early, fast and decisively to keep the project on course.

Additional support when you need it most

Sometimes you just need extra hands, a fresh perspective or someone who can quickly diagnose the problem. Our consultancy support services give you the expertise you need, exactly when you need it.

Whether it's a system issue, vendor review, data investigation or scoping a future project, we step in fast. We run independent reviews, test your landscape, challenge assumptions and resolve issues that may be slowing you down. It's practical, hands on support designed to get to the root cause not just treat symptoms.

Empowering your people to own the solution

A project isn't truly successful unless your people can run the solution confidently. Our training and knowledge transfer approach is built around capability: closing skills gaps, strengthening understanding and giving your team full ownership of the system.

We analyse skills, shape the right training strategy, build tailored materials and deliver training that hits the mark. From test data to detailed training plans and effectiveness measurement, we equip your people with what they need to use SAP with confidence long after go live.
